## P R E F A C E .

HAVING found that many coins of the Achæan League were not included in the catalogue by Herr Dr. Weil, published in the *Zeitschrift für Numismatic*, at Berlin, in 1882, I thought that numismatists would like to have a catalogue, with plates of all the silver and some of the copper of which I could obtain casts or impressions, with a description of all silver and copper ones that I could hear of or find described in other works, collected in one list. Those mentioned in Weil's catalogue are marked with \*.

I have mentioned in the catalogue where the individual coins are to be found, but it does not follow that they are to be found only in the collections mentioned.

For the history of the Achæan League I must refer to the Paper in the *Zeitschrift* of 1882, by the illustrious Professor Dr. R. Weil, prefixed to the above-mentioned catalogue; the Essay on Greek Federal Coinage, by Mr. Leicester Warren; a Paper, by Mr. Findlay in the *Numismatic Chronicle* for 1866, and the Introduction to the B.M. Catalogue of Coins of the Peloponnesus, Mr. Percy Gardiner, Litt.D.; but more especially to the late Professor Freeman's very full account of the League in his "Federal Government," London, 1863.

The silver coins of the League are divided by Weil into two classes. The first, those struck from about B.C. 330 to B.C. 280; the second, those struck after B.C. 280.

Those of the first class have, on the obverse, a head of Jupiter AR 1st class, laureated, of good workmanship, with no border on those that I have seen; and, on the reverse, a wreath of leaves tied above, surrounding the League monogram, No. 128, either with a letter or symbols, or alone.

Their weight is about 40-41 E. grains = 2·66 grammes.

Weight.

The silver coins of the second class have, on obverse, a head of Jupiter laureated, but of coarser workmanship, both with and without

a border ; and, on the reverse, a wreath (tied either above, below, or, on one coin of Corinth, at the side) surrounding the Achæan League monogram, having symbols, letters or monograms round it.

Weight. Their weight is from 32·5 grains E. to 44 grains E. = 2·10 to 2·85 grammes.

Copper coins. The copper Coins may be divided into four classes.

$\text{Æ}$  1st class. The first class have both obverse and reverse the same as the AR coins, first class, but wreath tied either above or below.

$\text{Æ}$  2nd class. The second class have, on obverse, a head of Jupiter, laureated, with long hair, sometimes a name is found behind the head ; and, on reverse, the League monogram, alone in wreath, tied above or below.

$\text{Æ}$  3rd class. The third class has head of Jupiter, like second class silver, on obverse ; on reverse, the Achæan League monogram with a letter or symbol, surrounded by wreath tied below.

$\text{Æ}$  4th class. The copper of the fourth class are coins of a much thicker fabric, and have, on obverse, Jupiter, naked, standing to left, holding in right hand a winged figure of Nike, and in left, a long sceptre ; reverse, Demeter Panachaia seated to left, holding in right hand a wreath, and in left, a long sceptre.

The name of the issuing town is always on these coins, so, if they are well preserved (which is seldom the case), there can be little doubt about the name of the town issuing them.

Weight. These coins of the fourth class seem to weigh from 71·5 grains to 87 grains = 4·63 to 5·508 grammes.

The  $\text{Æ}$  coins of the other classes weigh about 29 grains to 40 grains = 1·870 to 2·592 grammes.

New coin of Lusi. No. in catalogue 183. In Plate I there is a new silver coin from the author's collection. It belongs to the later class, and has AOY. below the A. L. monogram, and is, therefore, assigned to Lusi.

Coins of Cleitor. Nos. in catalogue 179, 180. The two coins on the same plate, with symbol of the sun facing radiate, were obtained by Mr. C. Oman, of All Souls', Oxford. One is still in his collection, and the other is in that of the author, and are assigned to Cleitor, from the letters KA $\Lambda$ H. and the symbol of the sun on the reverse.

The first three coins of those assigned to Ceryneia may perhaps Nos. 46-48. belong to Corone, as the monograms on the reverse can be read  
**KOPONEIA.**, leaving the *last three* for Ceryneia.

Nos. 49-51.

No. 312, under Messene, also may be assigned to Corone.

No. 312.

The four coins, Nos. 133 to 136, have been tentatively assigned to Nos. 133-136. Paga and Megara. They evidently belong to the one and the same town or towns. If ΠΑ. does not refer to a town, I should assign them all to Messene, as **ΠΑΝΤΙΣΟΣ.** appears as a name on League copper coins of Messene.

The coin, No. 173, assigned by me to Hermione, on Plate VII, has No. 174. been attributed to Messene and Sicyon by Dr. Percy Gardiner, Dr. Weil, and Mons. Cousinery. The monogram on left of the tripod is a common one for Hermione. The one on right of tripod can be read **ΜΑΣ.** Now, Masses was the port of Hermione, and the symbol above the tripod, the head of a trident, seems to show that the tripod was sacred to Poseidon, who certainly had temples near those places.

Coins of Troezen? Nos. 190,  
191.  
No. 331.

The last two coins, No. 7 on Plate VIII and No. 8 of catalogue under Mantinea may, perhaps, belong to Troezen. Also No. 5 in the catalogue under Uncertain. They all have a trident symbol, and on the left a letter **Ϛ**, like an **E** with no middle stroke and the vertical line prolonged above and below the horizontal strokes. The letter to right on No. 7 may be a **Y** or a **T**. The monogram on right of No. 331 is a curious one, like a **C** with a small **F** joined to it on its left side, the **F** being half the size of the **C** (square sigma). The trident is a symbol of Troezen.

Nos. 17 and 18 of Patrae may also belong to Troezen, as the dolphin is also a symbol of Troezen, or to Ægina. Is.

Nos. 79, 80 of catalogue.

No. 12 of Lacedæmon is curious, in having a club as well as the caps of the Dioscuri. This is in the Royal Museum at Athens, and was, I believe, found with some 1,500 others of the League in a jar at or near Patras. By the courtesy of Dr. J. N. Svoronos, the distinguished Curator, I was kindly permitted to examine them, and was furnished with casts or impressions of such coins as I required.

No. 125 of catalogue.

The coins 3 and 4 of Uncertain may be assigned to Lycoa or Nos. 329, 330.

( vi )

Lyc̄ea, as suggested by Mr. Gardner in his Preface to British Museum Catalogue of the Coins of the Peloponessus.

Nos. 171, 172. Coins Nos. 20 and 21 of Epidaurus I assign to that place, as No. 19 has the same letters, ΛΥΑ., with the symbol of a cupping-glass in the place of Ε.

I have found an exception to the rule, that all monograms and symbols are within the wreath, on the reverse of silver Achæan League coins.

On looking closely at No. 12 of Epidaurus on Plate VII, traces of a monogram may be seen below the wreath, and, on another coin, the monogram, No. 98, is quite clear.

Nos. 327, 328. Coins 1 and 2, under Uncertain, are from the find mentioned above.

From two other examples of No. 1, they appear to have on them a legend that may be read ΔΑ. or ΔΡ. on left, Ι or a pillar above, Υ on right, with Λ below. I should take the Λ to be the initial of the town, and the Ι on top to be a symbol, and ΔΡΥ. or ΔΑΥ. to be for the magistrate's name. There are two towns mentioned by Dr. Weil as having no known coins, though they belonged to the League, viz., Leontion and Lepr̄on, whose names begin with an Λ, and I should give it to one of them.

Cleitor, No. 332. Mr. Oman has just sent me the description of a new coin of Cleitor. Obverse, head of Jupiter to left; reverse, head of sun radiate below the Achæan League monogram, and Α to left with Μ to right of the same.

There are in the catalogue 3 silver and 9 copper coins of the Earlier Types, 329 silver and 111 copper of the Later Types; making a total of 443 coins in this catalogue.

Professor Weil's catalogue gives 1 silver, 5 copper of the Earlier Types, 152 silver and 80 copper of Later Types; making a total of 238 coins.

## EXPLANATION.

THE Achæan League monogram is taken to be erect with the stroke across the lower part and the way the symbol stands and the letters read.

The numbers in the descriptions of coins refer to the numbers on the separate plate of monograms.

The early coins and later silver are numbered consecutively, with a second number referring to the coins of different towns.

The following are the abbreviations used to distinguish the collections, and the numbers below them the numbers in the lists supplied me :—

- A. Royal Museum, Athens, Greece.
- B. British Museum, London, England.
- Ber. Imperial Museum, Berlin, Germany.
- G. University Museum, Gotha, Germany.
- Ha. Royal Museum, The Hague, Holland.
- P. National Museum, Paris, France.
- V. Imperial Museum, Vienna, Austria.
- T. Museum of Science and Fine Arts, Turin, Italy.
- N. Museum at Naples, Italy.
- H. Hunterian Museum, Glasgow, Scotland.
- Bod. Bodleian Museum, Oxford, England.
- F.W. FitzWilliam Museum, Cambridge, England.
- I. B. Collection of Dr. Herr Imhoff Blümer, Switzerland.
- W. Collection of Dr. H. Weber, London.
- O. Collection of C. W. C. Oman, Esq., F.S.A., Oxford.
- S. Collection of Col. J. Glas. Sandeman.
- C. Collection of Author.

I have to express my grateful thanks to the curators and collectors above-mentioned for their courtesy in sending me the cast or impressions that I asked for.

## IN CATALOGUE OF SILVER COINS:

The 1st column gives consecutive number.

- 2nd    "    "    number in each separate town.
- 3rd    "    "    side to which obverse head turns.
- 4th    "    shows where wreath is tied on reverse.
- 5th    "    letter, symbol or monogram above Ach. monogram.
- 6th    "    "    "    "    below                         "
- 7th    "    "    "    "    on left of                     "
- 8th    "    "    "    "    on right of                     "
- 9th    "    "    number of plate where illustrated.
- 10th    "    "    where coins are to be found.
- 11th    "    "    remarks.

## IN CATALOGUE OF COPPER COINS:

The 1st column gives consecutive number.

- 2nd    "    "    number of each separate town.
- 3rd    "    "    legends on obverse.
- 4th    "    "    "    reverse.
- 5th    "    shows where coins are to be found.
- 6th    "    "    remarks.

The numbers in columns 5-6-7-8 of catalogue of silver, and in columns 3-4 of catalogue of copper coins, refer to the plate of monograms in frontispiece.
